

# Boston Scientific

**Boston  
Scientific**  
Advancing science for life™

Providing minimally invasive technologies that help address healthcare's greatest challenges, so patients can experience **more of what truly matters: more time, more quality of life and more moments** with the people they love.

- **NEUROMODULATION:** Electronic implantable technologies and therapies that help patients manage debilitating chronic pain and neurological conditions
- **CARDIAC RHYTHM MANAGEMENT:** Technologies that monitor, support diagnosis, and treat irregular heart rhythms, heart failure and sudden cardiac arrest
- **ELECTROPHYSIOLOGY:** A broad range of technologies for diagnosing and treating heart rhythm disorders
- **WATCHMAN:** The most studied and implanted left atrial appendage closure device in the world, designed to reduce stroke risk in patients with non-valvular atrial fibrillation
- **INTERVENTIONAL CARDIOLOGY THERAPIES:** Technologies to improve the lives of patients living with heart and vascular conditions
- **PERIPHERAL INTERVENTIONS:** Leading devices for treatments of peripheral vascular disease, vessel trauma and cancer
- **ENDOSCOPY:** Devices for diagnosing and treating gastrointestinal and pancreaticobiliary conditions, and for supporting weight loss in patients with obesity
- **UROLOGY:** Comprehensive solutions to support kidney stone removal, prostate health, erectile restoration and urinary continence

## BOSTON SCIENTIFIC HIGHLIGHTS¹

FORTUNE 500 COMPANY  
**\$16.7 billion**  
IN NET SALES

**53,000**  
EMPLOYEES

**~100 products**  
LAUNCHED IN 2024

HELPING CLINICIANS TREAT  
**44 million**  
patients

**~\$1.6 billion**  
INVESTED IN R&D²
